The industry's most versatile mobile cart system for videoconferencing and presentation applications.

VTC-4280S shown with camera mount in upper position. This setup is for single-screen videoconferencing. The camera can also be positioned below the screen.

1 Cart Base

2 Lower Frame

3 Upper Frame

This area is for mounting Codexes, media extenders, power supplies, and similar small devices.

Patented Lever Lock™ mounting plate is easy to install & service. Additional Lever Lock mounting plates are available. Also includes 8 outlet 15 Amp power strip with surge and circuit breaker.

Display Capacity	Part #	Description	Base Capacity	Frame Capacity
Single 42" - 80"	VTC-4280S	Mobile Videoconferencing/Presentation Cart	3 rackspace	4 rackspace + 10" Lever Lock plate
Dual 42" - 55"	VTC-4255D	Mobile Videoconferencing/Presentation Cart	3 rackspace	4 rackspace + 10" Lever Lock plate
Dual 56" - 70"	VTC-5670D	Mobile Videoconferencing/Presentation Cart	3 rackspace	4 rackspace + 10" Lever Lock plate
Single 42" - 80"	VTC-4280S-R	Mobile Videoconferencing/Presentation Cart with Rack	3 rackspace	12 rackspace + 10" Lever Lock plate
Dual 42" - 55"	VTC-4255D-R	Mobile Videoconferencing/Presentation Cart with Rack	3 rackspace	12 rackspace + 10" Lever Lock plate
Dual 56" - 70"	VTC-5670D-R	Mobile Videoconferencing/Presentation Cart with Rack	3 rackspace	12 rackspace + 10" Lever Lock plate

Please note: cameras, displays, and mounted equipment are shown for illustration purposes.

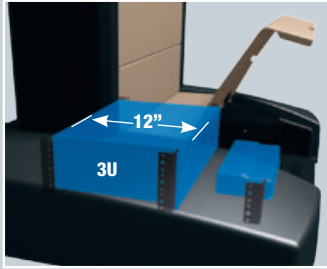

Start by installing your heaviest equipment in the 3 rackspace in the base section.

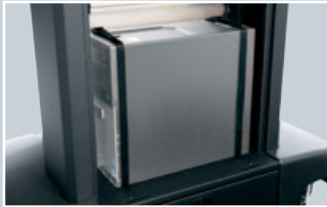

This location helps maintain stability, & is ideal for a UPS or amplifier.

Back of base features an area for umbilical cable storage or connection points.

If your equipment is 12" deep or less, you will also have room for non-rackmount gear in the front, such as a DVD player or interfaces.

The lower frame mounting location provides 4U of "knobs up" 18" deep rackmounting.

Perfect for codecs, switcher, processor, and similar equipment.

This mounting space is also great for holding tower-style PCs. The frame includes tie-off points to attach user-supplied straps if desired. (Straps not included.)

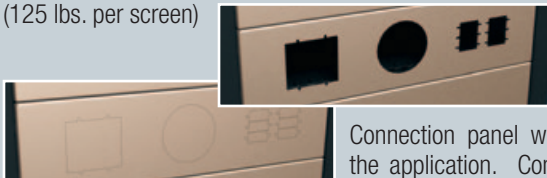

VTC-4280S-R shown. This setup is for presentation applications and features 15 total rackspace of equipment mounting space – 12 in the rack section and 3 in the base.

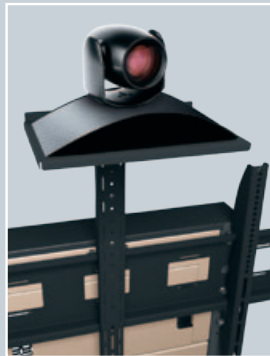

4 Display Mount

Single-mount models are made to hold displays up to 80" and 250 lbs. Dual-mount models are made to hold two displays up to 70", with a combined weight of up to 250 lbs. (125 lbs. per screen)

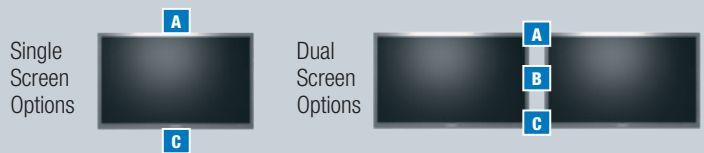

5 Camera Mount

All models come with a versatile camera mounting shelf. Single screen versions come with a shelf extender bar that can position the camera shelf above or below the display (positions "A" or "C"). Dual screen versions come with a "between screen" shelf mount that can be positioned at the top, center, or bottom of the display height (positions "A", "B", or "C").

Picture shows single screen version in upper position.

Connection panel with AVIP plate knockouts lets installers tailor the unit to the specifics of the application. Connection panel holds up to (6) AVIP plates, (1) UCP and (1) 3" grommets.

Options for VTC Series

Rack Version

Rack option replaces the lower frame 4U mounting area with a 12U x 14" deep rack. Rack frame is removable as a unit to allow easy prestaging, integration or maintenance access.

Storage Drawer

Convenient front storage drawer holds remote controls, manuals, and similar items. Also great for holding wireless microphones and charging stations to support system operation.

Work Surface

This option adds flexibility with a wide work surface that travels with the system. Great for holding laptop computers, DVD player, or any small items needed during system use.

Speaker Shelves

Speaker mount shelves are available in two sizes (5-1/2" and 11" heights) to accommodate many small speaker systems. Speaker mounts include acoustically transparent grille cloth.
